Paula Hare's Photography Career Expands

Milwaukee, Wis., July 28, 2008 . . . Earlier this month, Paula Hare had the unique opportunity to photograph Dr. Heffez, a neurosurgeon, in the operating room. It was a fascinating four-hour procedure, and offered some very interesting perspectives into brain surgery and the intensity of neurosurgeons at work.

Paula has done photo shoots for a number of clients over the past few years. Original, professional photos add value to any project, and are a great way to enhance your company's communications.

If you would like more information, would like to see more images, or think Paula may be able to do some photography for you, please contact:
